Statistics 1986

89-03394/

Honorable Robert Jackson
Minister of Municipal Affairs & Environment
Province of New Brunswick

Sir:

Pursuant to Section 5, Fire Prevention Act R.S.N.B. Chapter F-13 I have the honour to submit the Annual Report of the Fire Marshal for the year ending December 31, 1986.

The 1986 Annual Report reflects a revised Fire Reporting Structure implemented at the beginning of the calendar year.

The following is a list of the Tabular contents of the report:

| | |
|---|---|
| Table No. 1 | Summary of Losses By Property Classification |
| Table No. 2 | Summary of Losses By Building Height |
| Table No. 3 | Summary of Losses By Level of Fire Origin |
| Table No. 4 | Summary of Losses By Area of Fire Origin |
| Table No. 5 | Summary of Losses By Igniting Object |
| Table No. 6 | Summary of Losses By Fuel or Energy |
| Table No. 7 | Summary of Losses By Material First Ignited |
| Table No. 8 | Summary of Losses By Act or Omission |
| Table No. 9 | Summary of Losses By County and Municipality |
| Table No. 10 | Comparative Losses in Municipalities |
| Table No. 11 | Statement of Injuries and Fatalities |
| Table No. 12 | Summary of Fires in New Brunswick for 1986 by Month |
| Table No. 13 | Summary of Losses in Fires over $100,000 |

While the total number of fires has decreased to 2057 in 1986 from 2192 in 1985 it is interesting to note that the total dollar loss has increased to $21,321,906 from $17,992,520. This increase is partially due to a revised assessment system in the Province which more accurately reflects the true value of property.

Table 11 Statement of Injuries and Fatalities for New Brunswick during the reporting period shows 26 fatalities and in addition 20 injuries. The figure of 26 fatalities is slightly above the 10 year average of 25 for New Brunswick while the 20 injuries is well below the five year average of 30. In summary New Brunswick has a fire death rate of 2.64 and a fire injury rate of 2.78 for 1986. The fire rates are based on the number of fire deaths and injuries per 100,000 population per annum. The ten-year average death rate is 3.82 while the five-year average injury rate is 3.49.

In conclusion Sir, I wish to express sincere thanks for the support and co-operation that has been received from the government departments, insurance companies, insurance adjusters, Insurance Crime Prevention Bureau, Insurance Advisory Organization, Insurance Bureau of Canada, Royal Canadian Mounted Police and all the other police and fire departments with whom we work.

A special thanks is extended to all members of the staff of the Fire Marshal's Office for the diligent and hard work they have given during the past year.

I have the honour to be,
Sir,
Your obedient servant,

Medley E. Carr,
Fire Marshal

**Statistiques 1986**

L'Honorable Robert Jackson
Ministre des Affaires municipales et de l'Environnement
Province du Nouveau-Brunswick

Monsieur le Ministre,

Conformément à l'article 5 de la Loi sur la prévention des incendies, L.R.N.B., chapitre F-13, j'ai l'honneur de vous soumettre le rapport annuel du prévôt des incendies pour l'année terminée le 31 décembre 1986.

Le rapport annuel de 1986 est fondé sur une méthode révisée de présentation des rapports mise en oeuvre au début de l'année civile.

La liste suivante est un sommaire des tableaux figurant dans le rapport :

| | |
|---|---|
| Tableau n° 1 | Sommaire des pertes par classe de la propriété |
| Tableau n° 2 | Sommaire des pertes par hauteur du bâtiment |
| Tableau n° 3 | Sommaire des pertes par niveau où l'incendie a pris naissance |
| Tableau n° 4 | Sommaire des pertes par lieu d'origine de l'incendie |
| Tableau n° 5 | Sommaire des pertes par sources d'inflammation |
| Tableau n° 6 | Sommaire des pertes par combustible ou énergie |
| Tableau n° 7 | Sommaire des pertes par matériaux enflammés en premier |
| Tableau n° 8 | Sommaire des pertes par action ou omission |
| Tableau n° 9 | Sommaire des pertes par comté et par municipalité |
| Tableau n° 10 | Données comparatives des pertes par municipalité |
| Tableau n° 11 | Résumé des blessures et des décès |
| Tableau n° 12 | Incendies déclarés au N.-B. pour l'année 1986 par mois |
| Tableau n° 13 | Pertes de 100 000 $ et plus |

Bien que le nombre total d'incendies ait diminué légèrement, étant passé de 2 192 en 1985, à 2 057 en 1986, il est intéressant de noter que la perte totale en dollars a augmenté; elle est passée de 17 992 520 $ à 21 321 906 $. Cette augmentation est attribuable en partie au système d'évaluation révisé de la province qui tient davantage compte de la valeur réelle des biens.

Le tableau 11 Résumé des blessures et des décès pour le Nouveau-Brunswick indique 26 décès et 20 blessures pour la période visée par le rapport. Le chiffre de 26 décès est légèrement supérieur à la moyenne de 25 pour dix ans au Nouveau-Brunswick, tandis que les 20 blessures sont bien en-deçà de la moyenne de 30 pour cinq ans. En résumé, le Nouveau-Brunswick a un taux de décès provoqués par les incendies de 2,64 et un taux de blessures provoquées par les incendies de 2,78 pour 1986. Les taux de décès provoqués par les incendies sont fondés sur le nombre de décès et de blessures provoqués par les incendies par 100 000 habitants par année. Le taux moyen de décès provoqués par les incendies est de 3,82 pour dix ans tandis que le taux moyen de blessures et de 3,49 pour cinq ans.

En terminant, Monsieur le Ministre, j'aimerais exprimer mes sincères remerciements pour l'appui et la collaboration qui nous a été accordés par tous les ministères du gouvernement, les compagnies d'assurance, les experts en sinistres, le service anti-crime des assureurs, le Bureau d'assurance du Canada, la Gendarmerie royale du Canada, et tous les autres services de police et d'incendie avec qui nous travaillons.

Un remerciement spécial à tous les membres du personnel du bureau du prévôt des incendies pour avoir travaillé si diligemment et si ardemment au cours de la dernière année.

Rapport respectueusement soumis par,

Medley Carr
Prévôt des incendies
